This Company was started in February 2001 for the manufacture of soles in PVC and TPR for the shoe industry. It has a Technical Collaboration with M/s. Suolificio Malaspina S. r.l., of Italy, who are one of the world leaders for synthetic soles.

The company was initially set up with a capacity to manufacture half a million soles per annum, The entire technical know - how designs and development of soles of the art injections moulding machines from Italy enabled the company to produce soles of international standard. Key personnel of the company have been trained at the collabrators plant in Italy.

The sole authority

Due to the high quality standard of the product and its acceptance internationally SC has embarked on an ambitious expansion plan. Investments to the tune of over Twenty million rupees have been made. SC has now moved to a much larger premises comprising of floor space of around 16,000 sqft. with the ability to double this space at short notice. Yet another injection moulding machine for PVC & TPR has been added. A highly sophisticated range of machinery for producing Leather PVC/TPR encapsulated soles and Leather built units have been imported from Italy. The management of SC has been restructured with the induction of professionals from MNC's and also with the involvement of Malaspina S.r.l., in the day to day operations of the company. This has lead to an increase in efficiency of SC and decrease in lead - time required to service the needs of customers in terms of being able to react to quicker design and development and also be able to manufacture moulds and supply soles. The range of soles offered by SC includes PVC, TPR, Leather PVC/TPR encapsulated and Leather built soles.

The capacity of SC has now more than doubled to about 1.25 milion soles per annum. Further in the anvil are plans to introduce bicolour and dual densiy soles. Machines for these are already on order from Italy and SC will be in aposition to offer these soles also to all discerning customers from the second Quarter of 2003.

It is SC's vision to be a leading quality sole maker in the country offering types of soles with the ability to assist in the design and development of the needs of the customers and deliver on time.
